

UPDATE

Saturday, 5 October 2024

Carpeaurum© has successfully entered mainstream commerce with the issuance of a CDR (Custodial Deposit Receipt) by an Indonesian investment bank. In plain terms, we have Euros 500 billion on deposit.

Several financial institutions are approaching us to engage the CDR in leveraging, monetizing, hypothecating, exchanging and other imperatives like evidencing their balance sheets and off-ledger accounts.

MOST of the sincere inquirers, middlemen, frontmen, brokers, commission agents masquerading as “financial institutions” are just started to learn about the worth and value of the CDR. They have asked to sign up for the FBI Course. “Half a learning is a dangerous thing . . .” Run to the truth while running away from falsehoods.

The COKE (Corruption of Knowledge Endures) as a living hell. The education system has become Public Enemy Number One. Time we became autodidacts and relied solely on ourselves to learn, yearn and earn.

The FBI (Finance Banking Investment) industry is full of scams and chicanery where the falsity and fraudulent of paper money is being perpetrated like it is a bottomless pit. Then came cryptocurrency

with a known depth and known volume although not backed by any precious commodity, goods or services.

For those of you with CGC, please wait for the CDR to gain momentum which will allow you to exchange it for “the de-dollarized paper fiat money” which Carpeaurum© will compete in the global basket of currencies.

For those of you intending to purchase real estate, vehicles or anything at all, tell the merchants or suppliers of goods you are willing to use your CGC as legal tender because paper money is an unconstitutional act although everyone uses it. If 100 million people say and do a foolish thing, it is still a foolish thing.

If any of you is involved with the top echelon of financial institutions, please engage them in a discussion concerning the CDR. If it gets too technical, tedious and complicated, have them contact me via email (chiefjudge@secamtektektribe.org) with a specific LOI (Letter of Interest/Intent).

The biggest scam is the “get a SBLC/MT760 and we are off to a trading platform (PPP). “My irresistible response: “hey moron, I have a CDR, why would I want to lower my worth and value by “applying” for the SBLC/MT760.” The moment I say this, the “expert’ vanishes.

The FBI industry is getting wiser, brighter, bigger, and better with new people creating new ideas and concepts without which the FBI industry stagnates.

Good luck.
